

Polarized Antiprotons

Physikzentrum Bad Honnef, June 23-25, 2008

<http://www.fe.infn.it/heraeus/>

Organizers: **Dr. Paolo Lenisa (Univ. di Ferrara and INFN, Italy)**
Dr. Frank Rathmann (Forschungszentrum Jülich GmbH, Germany)

The aim of the seminar will be to both highlight the potentialities that a polarized antiproton beam will bring to the hadron physics community and to illustrate the present status of the experimental and theoretical efforts devoted to the first ever production of a beam of polarized antiprotons. The WE-Heraeus Seminar will bring together the experts in the field, and at the same time, we will also try to involve young students into this challenging enterprise.

Speakers:

K. Aulenbacher (Univ. Mainz, Germany)
P. Belochitsky (CERN AB/OP)
F. Bradamante (Univ. di Trieste and INFN, Italy)
E. Cisbani (INFN - Roma, Italy)
M. Contalbrigo (INFN - Ferrara, Italy)
J. Haidenbauer (FZJ - Jülich, Germany)
K. Knie (GSI - Darmstadt, Germany)
I. Koop (BINP, Novosibirsk, Russia)
P. Kroll (Univ. Wuppertal, Germany)
A. Lehrach (FZJ - Jülich, Germany)
F. Maas (GSI and Mainz University, Germany)
S. Melis (Univ. Torino, Italy)
A. Metz (Univ. Bochum, Germany)
A. Nass (Univ. Erlangen-Nürnberg, Germany)
M. Nekipelov (FZJ - Jülich, Germany)

H. O. Meyer (Indiana University, USA)
W. Oelert (FZJ - Jülich, Germany)
D. Oellers (FZJ - Jülich, Germany)
D. Prasuhn (FZJ - Jülich, Germany)
P. Ratcliffe (Univ. Insubria, Italy)
K. Rith (Univ. Erlangen-Nuernberg, Germany)
A. Schäfer (Univ. Regensburg, Germany)
R. Schleichert (FZJ - Jülich, Germany)
O. Shevchenko (JINR - Dubna, Russia)
E. Steffens (Univ. Erlangen-Nuernberg, Germany)
V. Strakhovenko (BINP - Novosibirsk, Russia)
H. Ströher (FZJ - Jülich, Germany)
E. Tomasi-Gustafsson (CEA/Saclay, France)
T. Walcher (Univ. Mainz)

A Poster Session will be organized during the workshop: Participants are invited to bring their posters
Prizes for the best posters will be awarded
