

**Physics Division Technical, Cost and Schedule Review of the Hall B RICH  
September 5 + 6, 2013**

**Charge:**

1. Evaluate the feasibility and merit of the proposed technical approach, including:
  - the completeness of the technical design and scope,
  - the maturity of the technical design, and
  - the likelihood that the detector will deliver the stated science goals.
2. Evaluate the feasibility and completeness of the proposed budget and schedule, including the workforce requirements and availability.
3. Evaluate the effectiveness of the proposed management structure, both in terms of the integration of the RICH within CLAS12 and the approach to ES&H.

Please address the above questions point-by-point. You will be supplied with the report of an initial technical review of the Hall B RICH detector that occurred recently (June 26-27, 2013), as part of the pre-brief material package.
